

# Jayashish Muppur

Full Stack Web Developer

jayashishmuppur@gmail.com | +91 9966029761 | DOB - 5 Dec, 2005

## SKILLS

### PROGRAMMING

Languages

- Advance: HTML, CSS, Bootstrap
- Intermediate : Java, JavaScript, Node.js, EJS, Express.js, Tailwind, REST API, MongoDB, Firebase, websocket.io, WebRTC
- Novice: React.js, Next.js, SQL

Tools

- GIT • Windows • Mac • Figma
- NPM • Postman

### OTHERS

- Exploring new technologies

## EDUCATION

### B. Tech, CSE

Vellore Institute of Technology  
2023-27 | Vellore  
CGPA: 8.87

### Intermediate, MPC

Gitam Junior College  
2021-23 | Tirupati  
Percentage: 93.8%

### Board of Secondary

#### Education

Sri Chaitanya High School  
2020-21 | Tirupati  
Percentage: 99%

## LANGUAGES KNOWN

- English • Hindi • Telugu • Spanish

## EXPERIENCE

Full stack developer intern

Year: 2025 - Present

Company - Qube Space LLP

- Contributed to end-to-end development of web applications using modern front-end and back-end technologies.
- Built and optimized responsive user interfaces, integrated APIs, and supported database management.
- Collaborated with the development team to deliver scalable and efficient solutions.

## PROJECT(S)

### Blood Line

HTML | CSS | JavaScript | Firebase

**Problem:** The blood donation process often faces challenges such as delays in donor-recipient matching, lack of real-time updates, and inefficiencies in emergency situations. Blood Line is a next-generation web application that streamlines blood donation by providing real-time donor matching, emergency request notifications, and an interactive donor map. Built with JavaScript and Firebase, it ensures secure authentication, encrypted data handling, and seamless backend operations using Firebase Cloud Functions. As a Progressive Web App (PWA), it offers a mobile-friendly and accessible solution to enhance the blood donation experience.

Year : 2025

### Code Collab

CSS | EJS | Node.js | Express.js | MongoDB | Socket.io

**Problem:** Designed and developed a collaborative coding platform ("code collab") that enables real-time code sharing, editing, and communication among multiple users. Enhanced the platform by integrating AI models to assist with code generation, review, and problem-solving. Implemented interactive coding challenges to facilitate learning and skill assessment, addressing technical challenges in concurrent editing, secure user authentication, session management, and scalable code execution environments.
